

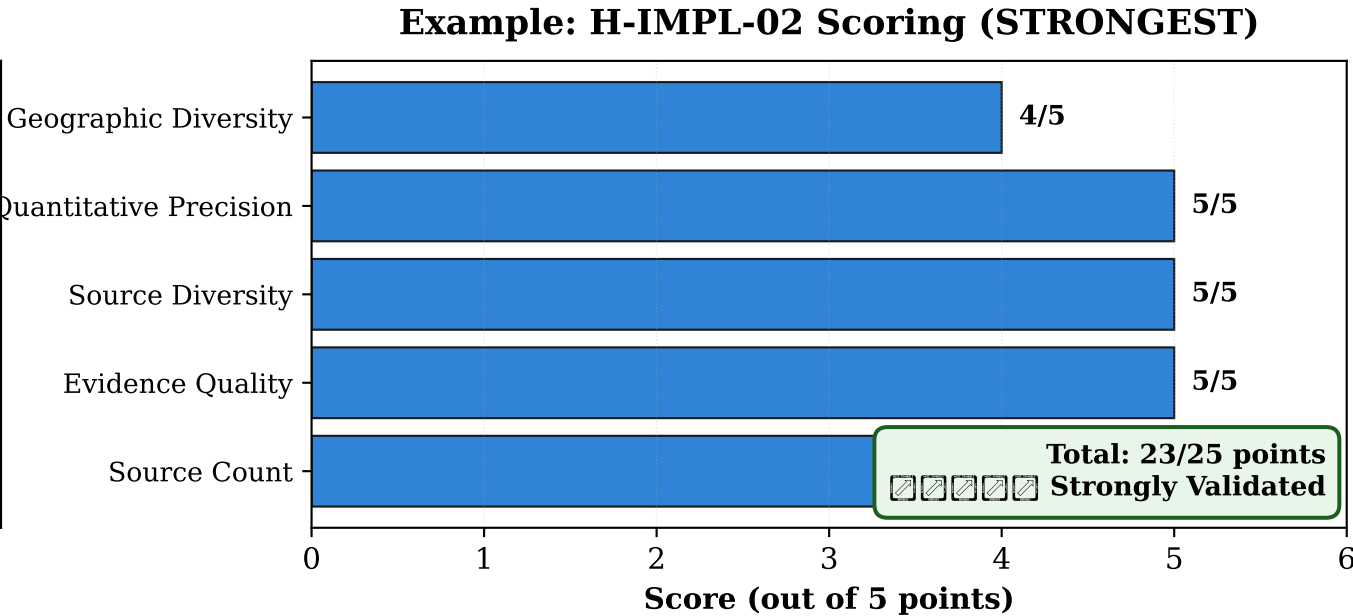

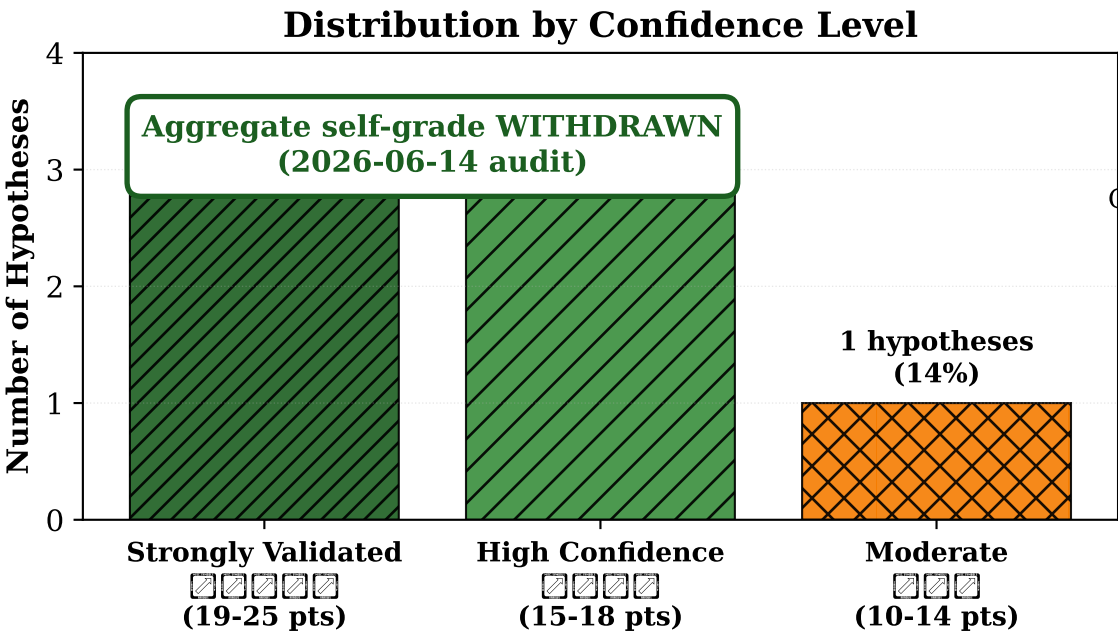

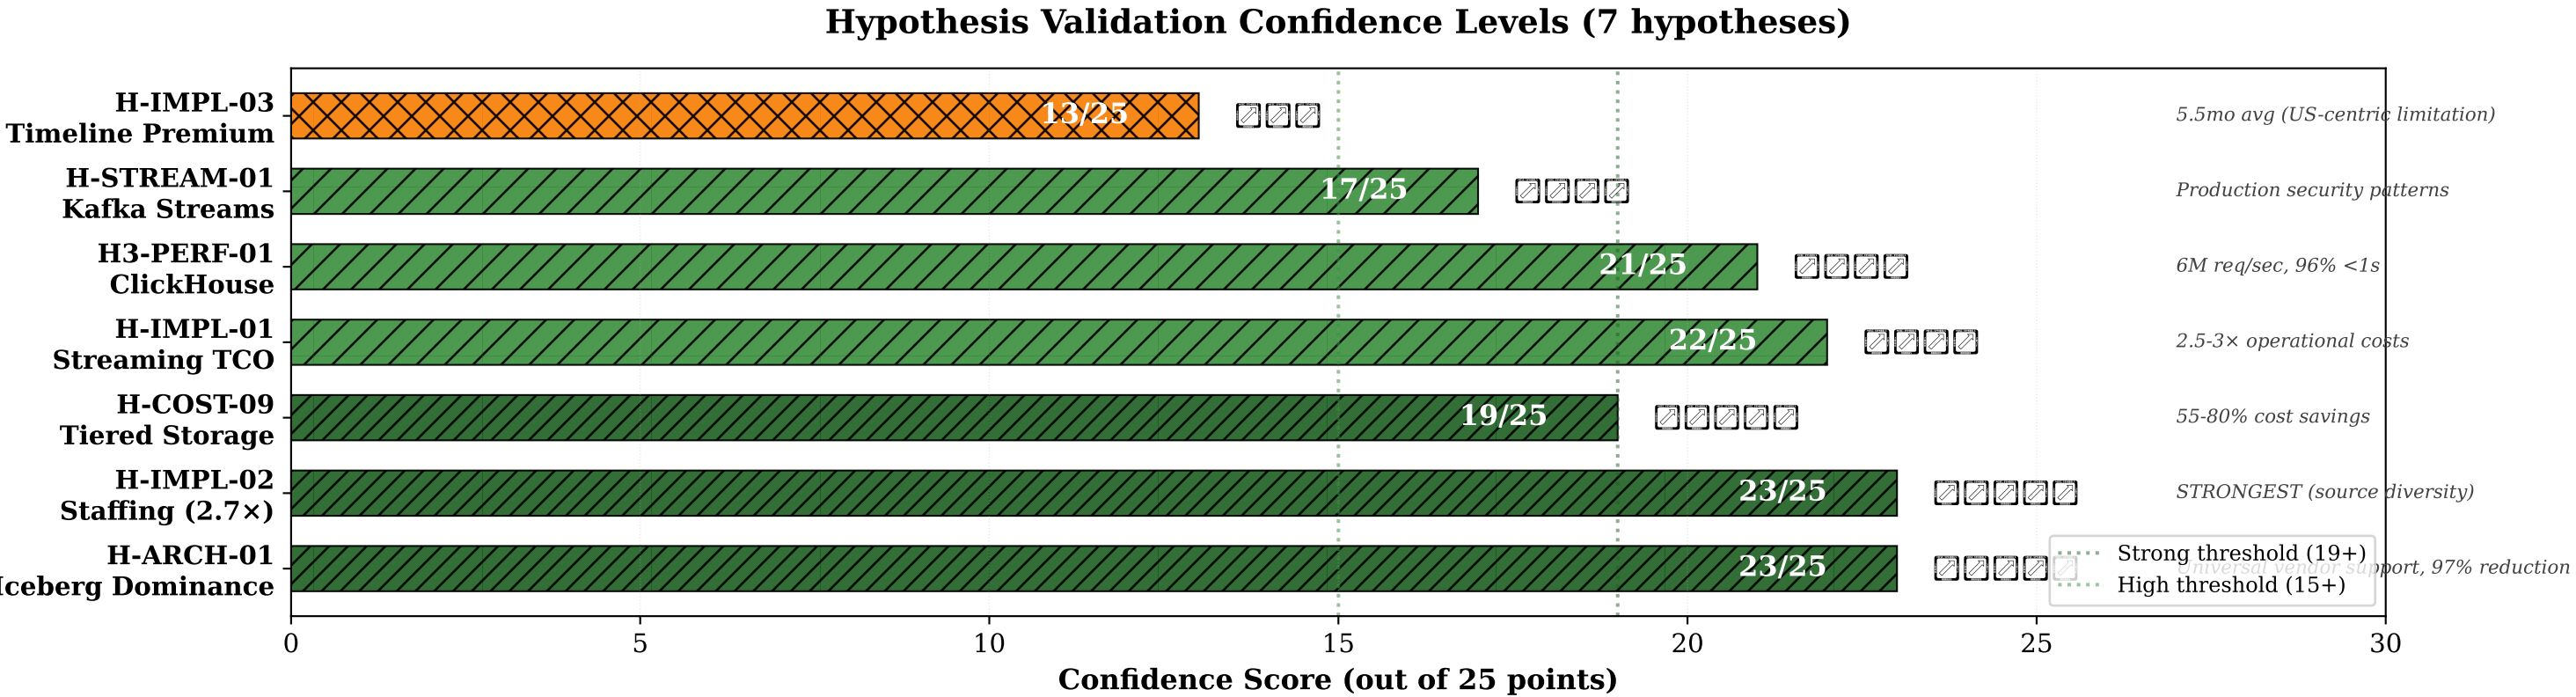

Figure 4: Hypothesis Validation Confidence Levels (per-hypothesis; aggregate self-grades withdrawn — 2026-06-14 audit)

Overall Validation Quality Summary:

- Total Hypotheses Validated: 7 (100% of identified hypotheses)
- Average Sources per Hypothesis: 4.1 sources (multi-source validation)
- Aggregate self-grades WITHDRAWN (2026-06-14 audit): the average Evidence-Level-A and the High-or-Strong-confidence aggregates are withdrawn – no aggregate % is claimed pending re-verification.
- Per-hypothesis scores below are provisional; 3 of 7 hypotheses require re-validation (entries removed in the audit). See FIGURES-AND-TABLES.md.
