

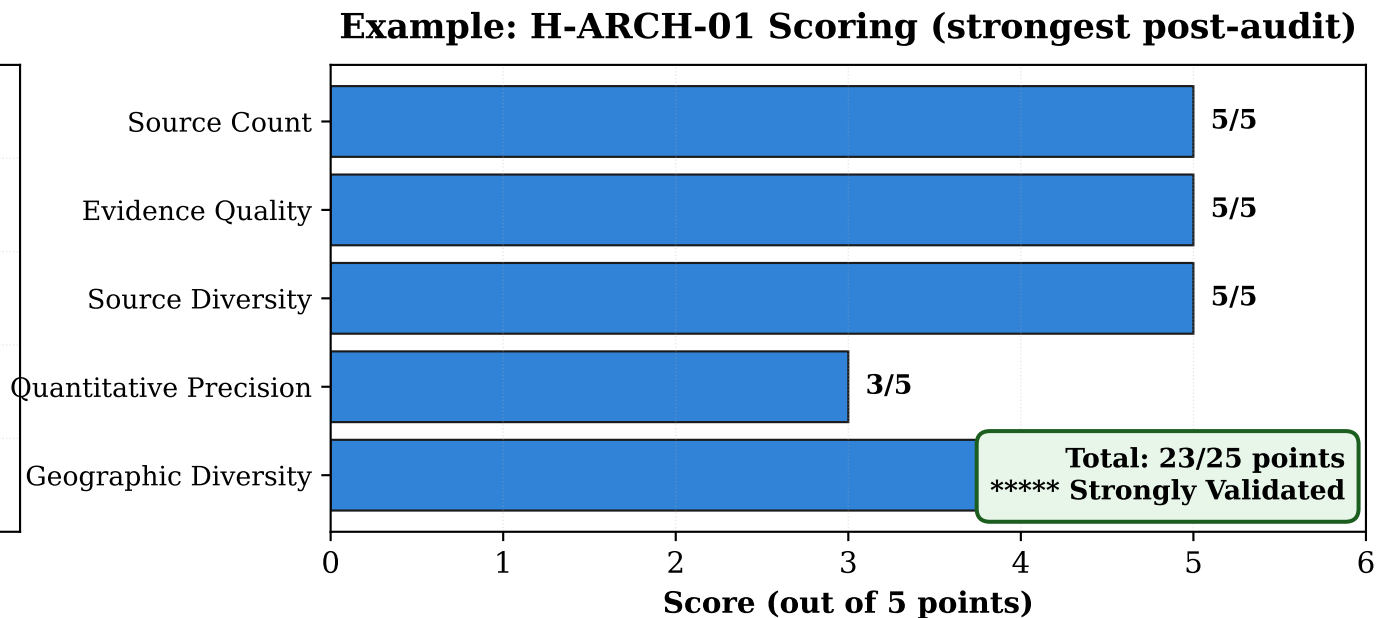

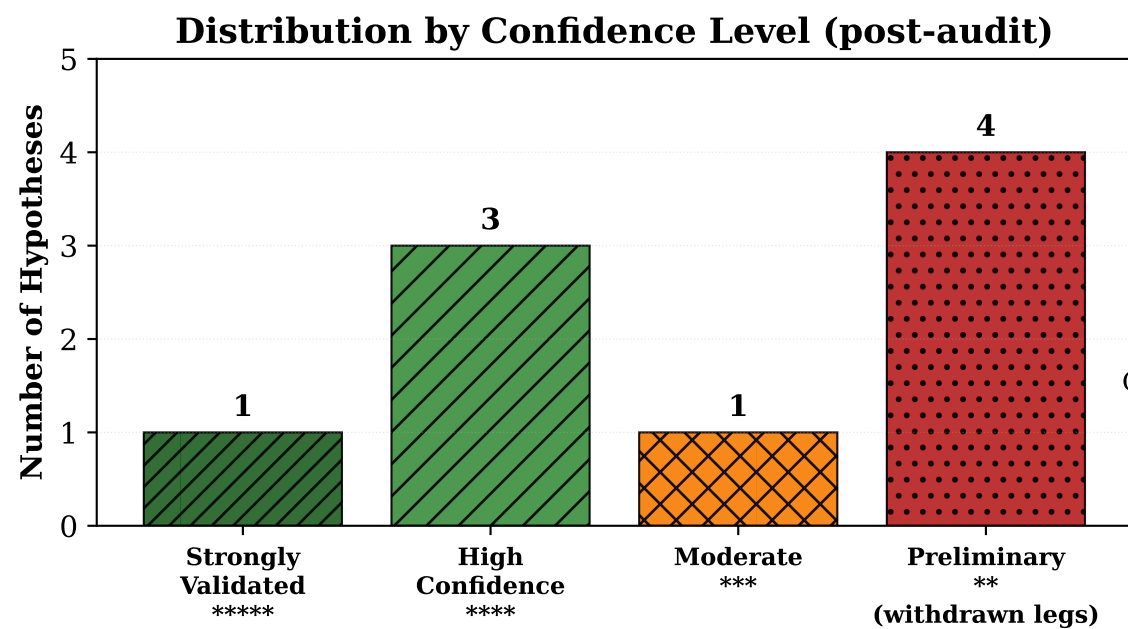

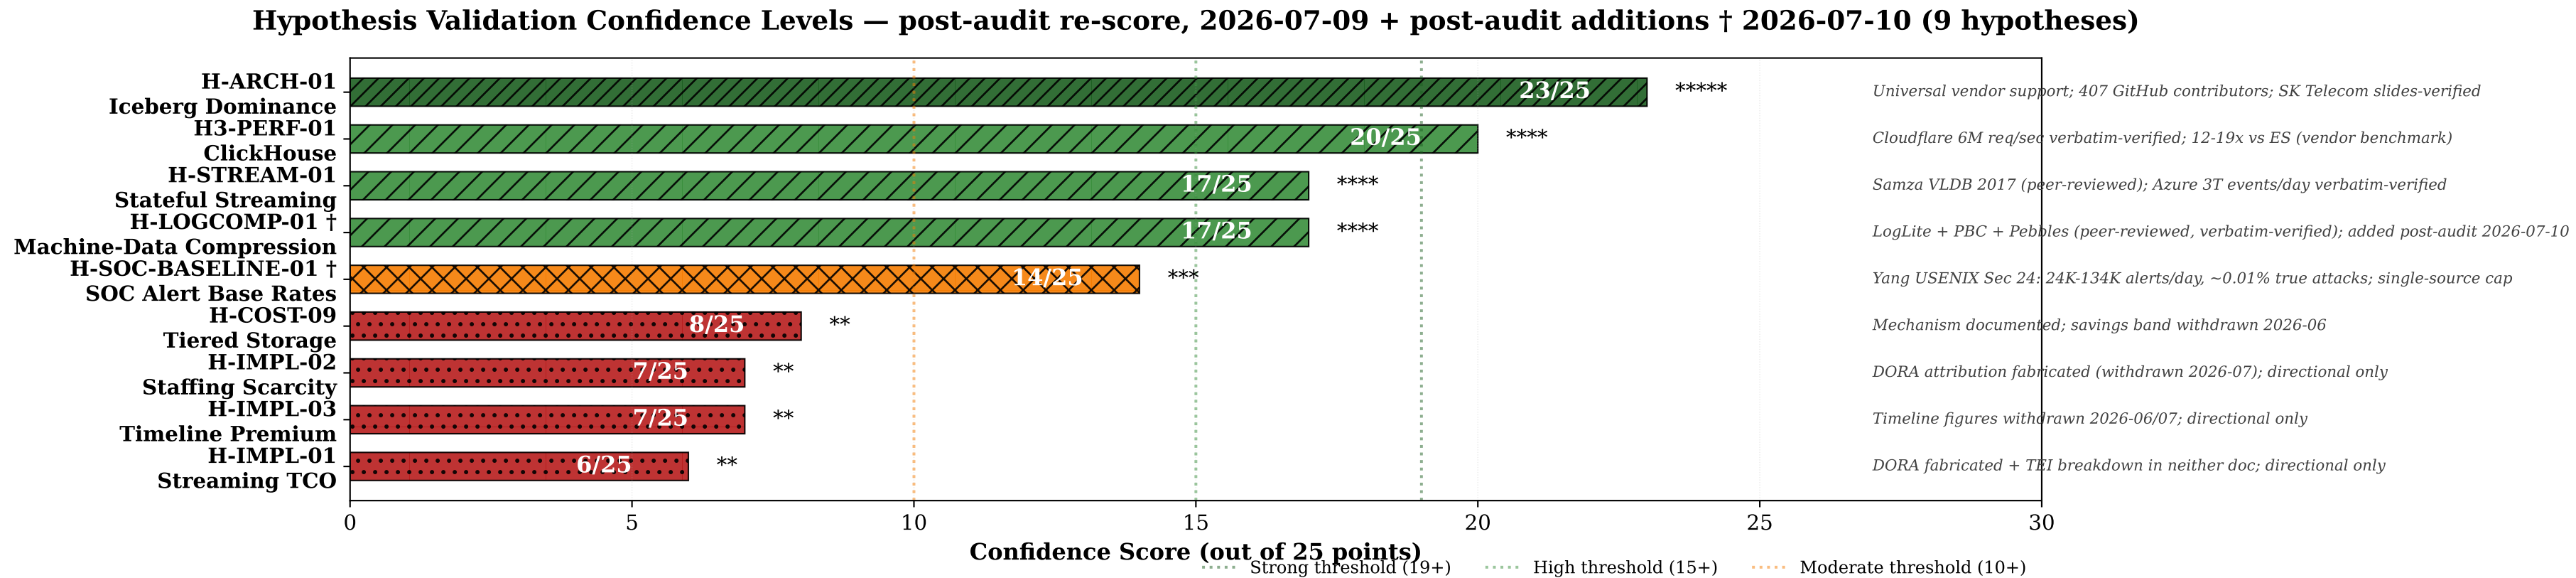

Figure 4: Hypothesis Validation Confidence Levels — post-audit re-score (2026-07-09)

Post-audit validation summary (re-scored 2026-07-09; RESCORE-PROPOSAL-2026-07.md):

- Findings VALIDATED on primary-verified production evidence:
 - 1 strongly validated (H-ARCH-01), 3 high confidence (H3-PERFORMANCE-01, H-LOGCOMP-01, H-STREAM-01), 1 moderate (H-SOC-BASELINE-01).
- Organizational-cost findings PRELIMINARY: 4 hypotheses (H-IMPL-01/02/03, H-COST-09) lost their quantitative legs to the 2026-06 audit and 2026-07 verification sweep (fabricated attribution or figures absent from cited sources); each is stated directionally pending re-sourcing.
- Every score reflects only evidence that survived primary-source verification.
